Nanavati Hospital Heart Institute

Heart Institute at Nanavati Super Specialty Hospital is a unique and dedicated institution of Cardiac Care, which has achieved a perfect blend of clinical excellence and aesthetic ambiance. The department has a team of highly experienced and qualified faculty providing 24X7 Interventional Cardiac Services such as radial and femoral coronary angiography, angioplasty, peripheral and neurological interventions, paediatric interventions as well as electrophysiological ablation.

New highlight in the heart institute – Catheterization Lab

Recently Allura Xper FD 10 System has been installed; this machine is the first of its kind in Mumbai. It has many excellent features like big screen (LED-56”), swing camera and dose reduction. All these features make this machine unique and better as compared to other Cath Labs. One can have 1 to 6 images on the screen with no change in table position as the camera swings in various standard views automatically. Dedicated ICCU adjacent to Cath lab and Cardiac OT fully equipped to handle all cardiac emergencies.

Heart Institute (NHHI) comprises of:

- ◆ Invasive Cardiology
- ◆ Cardiovascular & Thoracic Surgery
- ◆ Non Invasive Cardiology
- ◆ Paediatric Cardiology
- ◆ Intensive Cardiac Care Unit (ICCU)
